✓ Yearly program (70mm case)

...the new yearly time switches from Hugo Müller

You have the choice between the new 35mm- and 70mm-sized yearly time switch from Hugo Müller and however you decide, the easy and intuitive handling of the broad range of functions inspires.

Up to 4 channels, DCF-function, data-key function, 300 memory locations, external input, the yearly program (up to 10 special-"weekly"-programs can be called up by date) and the Easter function are making a highlight out of the yearly time switch.

24h ^{prog}	pulse
week ^{prog}	cycle
year ^{prog}	front
internal 300 intern	⚠️☀️☀️☀️
2345h	timer
data	dcf

Complete range of functions...

The Hugo Müller times switch with yearly program will impress you with a large range of functions. The yearly program with some sophisticated options is the highlight of the *pro-Generation*.

Example of a yearly program...

*Standard-weekly-program: With the standard-weekly-program you can activate up to 300 switching times per day-time and weekday. E.g. switching ON at 7 AM and OFF at 5 AM from monday to friday.

**Special-weekly-program: You can call up special-weekly-programs by date as often as required. E.g. activation date of a special program between March 15th and April 18th: The special program is a weekly program that switches ON at 10 AM and OFF at 12 PM from Monday to Friday. As long as a special program is active the standard-weekly-program is disabled. With Easter-function enabled the activation date of the special program shifts by the yearly offset of the Easter holidays.
